

Economic Growth Region 10

Statistical Data Report for January 2016, Released March 2016

Regional and State Unemployment (seasonally adjusted)

Regional and state unemployment rates were little changed in January. Twenty-eight states and the District of Columbia had unemployment rate decreases from December, eight states had increases, and 14 states had no change, the U.S. Bureau of Labor Statistics reported. Thirty-seven states and the District of Columbia had unemployment rate decreases from a year earlier, nine states had increases, and four states had no change.

In January, the only region with an unemployment rate measurably different from that of the U.S. was the West at 5.3 percent. Over the month, the West also had the only statistically significant unemployment rate change (-0.2 percentage point). Significant over-the-year rate decreases occurred in all four regions: the Northeast (-1.0 percentage point), West (-0.8 point), Midwest (-0.5 point), and South (-0.4 point).

Economic Growth Region (EGR) 10

Clark, Crawford, Floyd, Harrison, Scott, and Washington Counties.

Unemployment Rates by State, January 2016 (seasonally adjusted)

U.S. - 4.9%
Illinois - 6.3%
Indiana - 4.6%
Kentucky - 5.8%
Michigan - 4.9%
Ohio - 4.9%

Reasons people give for not being in the labor force, 2004 and 2014

January 21, 2016

People who are neither working nor looking for work are counted as “not in the labor force.” The proportion of the civilian working-age population who were in this group increased from 31.3 percent in 2004 to 35.0 percent in 2014. Over that 10-year period, the proportion of people who reported retirement as the main reason they were not working increased from 13.9 percent to 15.4 percent.

Proportion of the total civilian noninstitutional population 16 years and older that was not in the labor force by reason, 2004 and 2014:

Reason for not participating in the labor force	2004	2014
Total	31.3%	35.0%
Illness or disability	5.5	6.5
Retired	13.9	15.4
Home responsibilities	6.0	5.4
Going to school	5.0	6.4
Other reasons	0.9	1.2

The proportion of the working-age population reporting school attendance as the main reason for being out of the labor force rose from 5.0 percent in 2004 to 6.4 percent in 2014. The percentage who cited illness or disability as the main reason increased from 5.5 percent to 6.5 percent over that same period. The proportion citing home responsibilities declined from 6.0 percent in 2004 to 5.4 percent in 2014.

These data are from the [Current Population Survey](#) and its Annual Social and Economic Supplement (ASEC). The data are limited to people who were not in the labor force at any time during the reference year and the reasons they gave for not working.

For more information, see the [Beyond the Numbers](#) article “[People who are not in the labor force: why aren't they working?](#),” by Steven F. Hipple
